

Aditya Mehta

+91 9915417234 | adi.mehta002@gmail.com | Chandigarh, Punjab, India

Professional Summary

Computer Science Engineering student (Batch 2027) specialising in AI & ML at Chandigarh University. Proficient in Java, Python, C, and C++ with a solid grasp of Core Java concepts including OOP, Collections, Exception Handling, and Multithreading. Experienced in full-cycle software development using the SDLC model, covering requirements analysis, system design, unit testing, and UAT. Holds 5 industry certifications across AI, ML, and Microsoft Azure. Actively seeking a Java internship to apply software engineering skills in a fast-paced product environment.

Education

BE (Hons.) Computer Science Engineering – AI & ML	<i>2024 – 2027 (Expected)</i>
Chandigarh University, Gharuan, Mohali, Punjab	
- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Software Engineering, Computer Networks, Artificial Intelligence - Active in technical events; secured 1st Position in Short Film Making at Technia Tech Event (2024)	
Class XII – Science (Punjab State Board)	<i>2022 – 2023</i>
Triple M Public School	<i>89.8%</i>
Class X (CBSE)	<i>2020 – 2021</i>
Delhi International School, Hoshiarpur	<i>83.6%</i>

Technical Skills

Primary Language	Java (Core Java – OOP, Collections, Exception Handling, Multithreading)
Other Languages	Python, C, C++, SQL
Software Dev	SDLC, Unit Testing, UAT, Requirements Analysis, System Design, Clean Code
Databases	SQL (schema design, query writing, data modelling)
Tools & Platforms	Git, Microsoft Azure, Azure AI Services, Visual Studio, Google Colab, MySQL
Soft Skills	Analytical Thinking, Problem Solving, Leadership, Team Collaboration, Communication

Projects

AQI Prediction Software	<i>2026</i>
<i>Python · SQL · SDLC · OOP · Data Preprocessing</i>	
- Architected a modular, object-oriented application to predict Air Quality Index values from historical environmental datasets, applying OOP design principles (encapsulation, separation of concerns) throughout. - Followed the complete SDLC model – requirements gathering, system design, coding, unit testing, and deployment – maintaining clear documentation at each phase to reduce rework. - Designed clean interfaces between modules enabling independent testing of each component, improving model training efficiency and prediction accuracy across multiple pollutant parameters.	
Food Wastage Monitoring System	<i>2026</i>
<i>Python · SQL · SDLC · Unit Testing · UAT</i>	
- Designed and developed a full-stack food-wastage tracking system using Python and SQL: defined the database schema and wrote structured queries to log and categorise waste patterns across institutional meal cycles. - Applied SDLC methodology end-to-end; conducted systematic unit testing and User Acceptance Testing (UAT), achieving a stable, user-validated release. - Generated automated trend reports enabling institutions to identify peak wastage periods, demonstrating ability to write clean, maintainable code with real operational impact.	
Smart Dustbin with Advanced Features	<i>January – May 2024</i>
<i>Arduino · C++ · IoT · Embedded Systems</i>	
- Engineered an Arduino-powered smart dustbin with motion-sensor-triggered lid operation; wrote embedded C++ code achieving sensor response time under 1 second across 100+ test cycles. - Integrated a mosquito-killer module and solar power supply, making the unit fully self-sufficient for off-grid outdoor deployment.	

Laser Beam Security System

2024

Arduino · C++ · Embedded Systems · Low-latency Design

- Developed a perimeter intrusion-detection system using a laser beam and Arduino-controlled buzzer; implemented interrupt-driven logic achieving alert latency under 0.5 seconds.
- Designed for scalable deployment in restricted-access areas with clean, well-structured embedded code suitable for extension to multi-zone monitoring.

Experience

Community Development Intern

June 2024

NGO Village Betterment Initiative – Ghukarwal, Punjab

4 Weeks

- Led a structured 4-week field assessment of village Ghukarwal covering infrastructure gaps, education access, and self-help group effectiveness across a community of 500+ residents.
- Coordinated with NGO leadership to execute 3 community initiatives: marriage assistance outreach, a plantation drive (50+ saplings), and a social media awareness campaign.
- Managed social media content strategy during the internship, increasing post frequency and online community visibility through consistent, targeted outreach.

Certifications

- Microsoft Azure AI Fundamentals (AZ-900) – Microsoft
- Artificial Intelligence Fundamentals – IBM
- Predictive Analytics – IBM
- Introduction to Machine Learning
- Introduction to Generative AI

Achievements

- **1st Place** – Short Film Making, Technia Tech Event, Chandigarh University (2024); competed against 20+ teams.
- 5 professional certifications in AI, ML, and Cloud completed within the first year of undergraduate study.

Interests

Sports · Reading · Painting · Videography & Photography
